

A strong naval partner

Logimatic develops, implements and supports STRATECA - and has a long history of creating maritime automation solutions. We emphasize building and maintaining core competences which are essential in delivering the best possible solutions whitin the wordwide maritime area.

The range of solutions we develop, deliver and supports also covers INSEACON IPMS (Integrated Platform Management System) and CMAS (Control Monitoring Alarm System) as well as customized specializations in relation to energy optimation and automation design. Please visit www.logimatic.com for more info.

Here is a selection of what we also offer:

Basic design or specifications for:

+ Shipping companies, shipyards or shipbuilders.

Detailed design:

- + Progress
- + Security system
- + Communication system
- + Electrical design & lighting installation
- + Handling of ballast water
- + Technical purchase specification
- + Sample programs and tests: HAT, SAT, FAT
- + Operating manuals

Functions

STRATECA supplements or even replaces part of the exisiting radio communication between DC HQ and the patrols. Information is entered and displayed on operat stations and laptops placed on strategic important locations onboard.

Efficient Damage Management

STRATECA helps taking the right decisions during critical and stressed situations. The system ensures a better and more efficient damage management process that will secure the survivability of the ship for both the conduct of the mission and for the safety of the crew.

DEMO session

Please ask for at STRATECA demo session. The session will include a short tour around the STRATECA system where we will do our best to meet your questions and needs.

- + Information sharing via operator stations and laptops
- + All relevant information logged for documentation
- and performance evaluation
- + Standalone system can also be integrated with
- existing control system
- + Customizable to meet specific requirements
- Unlimited number of clients
